

#### About us

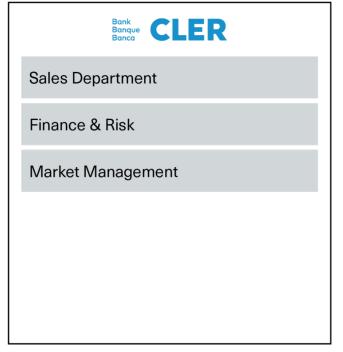

Group BKB consists of the parent company and Bank Cler. Since its foundation in 1899, the parent company BKB has been deeply rooted in the Basel region and positions itself for its private clients as the bank of Basel for Basel. BKB operates a total of twelve branches and an SME centre in the city canton. Asset management ensures a high level of investment expertise, from which not only the Private Banking clientèle benefits. As a universal bank it is active for its corporate and institutional clients throughout Northwestern Switzerland. BKB is majority-owned by the Canton of Basel-Stadt and has a state guarantee that is compensated to the Canton. The owner strategy sets the strategic guidelines and requires above-average equity capitalisation and liquidity. With an AAA rating from Fitch and an AA+ rating from S&P Global Ratings, BKB is one of the safest banks in Switzerland. Its financial strength or solidity, coupled with deep local roots and client proximity, are the most important unique selling points of BKB. In addition, sustainability in both operations and core business is a central prerequisite for making a positive contribution to the economy, environment and society in the long term. Fourteen per cent of the equity of CHF 354 million is listed as participation certificates on the SIX Exchange.

With the acquisition of Bank Cler (previously "Bank Coop") in 2000, today Group BKB employs almost 1,400 people and is present in all major cities throughout Switzerland. Bank Cler has a total of 24 branches, divided into three market areas "Central" (seven branches), "South-East" (ten branches) and "French-speaking Switzerland" (seven branches). Thanks to digital services, clients of both banks can also perform the most important banking services independently of time and place. The neobanking app Zak is proof of how easy banking can be. Bank Cler has been making Zak available for everyday banking services for several years and is continuously developing it further, including through new functionalities and partner offers. Zak has now successfully established itself as a neobanking service and the number of active users has increased to over 60,000. Thus, Bank Cler is positioning itself as a fresh, smart and Swiss bank that, with Zak, also appeals to a broad and digitally savvy client segment. With this business model, Bank Cler optimally complements the parent company and contributes to the geographical diversification of income streams within the Group.

The client funds of the Group BKB amount to around CHF 29 billion. Based on the total assets of CHF 55.3 billion, the Group is one of the ten largest banking groups in Switzerland.

#### Business development over the first half of 2023

### Revenues have grown and profitability has increased

The strategic focus on our strengths, excellent creditworthiness and our proximity to clients are once again making an impact: Group Basler Kantonalbank (BKB) achieved profitable growth in the first half of 2023 and significantly improved its operating result again.

In the first half of 2023 Group BKB achieved a +32.3 % increase in operating performance or a +20.7 % increase in consolidated profit. Christoph Auchli, CFO of BKB, summarises the half-yearly result: "We have continued to develop along our strategic priorities and have grown profitably. By focusing on our strengths, we have succeeded in broadening our earnings base, keeping costs under control and increasing efficiency. This means that we have already achieved all of our strategic goals for 2025 in terms of profitability, stability and balance sheet quality."

CFO Christoph Auchli: "By focusing on our strengths, we have succeeded in broadening our earnings base, keeping costs under control and increasing efficiency."

#### Five highlights characterise the first half of 2023

# **#1**Stability and client proximity as a foundation

Significant increase in earnings

In the challenging environment of rising interest rates and volatile financial markets, the operating income of Group BKB increased significantly by +12.7 % to CHF 337.0 million. Gross income from the interest business has risen particularly significantly: It increased by +18.5 % to CHF 229.4 million. The top rating received in January 2023 and confirmed in July 2023 of AAA from the international rating agency Fitch further strengthened confidence in the soundness of BKB and enabled broader refinancing on the money and capital markets. Thanks to the high quality of the loan portfolio, no additional value adjustments had to be made in the interest business. The +23.1 % increase in net trading income to CHF 35.5 million has been driven by successful trading in interest rate instruments. Thanks to the expansion of investment solutions and asset management mandates, the success of the commission and services business has become an important pillar of earnings in recent years. It is still slightly lower than a year ago due to declining transactional income and the elimination of a one-off effect in the previous year (-4.4 % to CHF 67.6 million).

## **#2** Focusing works

Increased productivity and profitability

Thanks to a further increase in efficiency and productivity, operating expenses were reduced by -0.3 % to CHF 167.0 million despite the growth in volume and investments in strategic initiatives. As a result of the profitable growth, operating performance in the first half-year increased significantly by +32.3 % to CHF 155.9 million and the cost-income ratio fell by -6.6 percentage points to 49.6 %. After another high allocation to reserves of CHF 72.0 million (previous year CHF 48.2 million), profit increased by +20.7 % to CHF 75,5 million in the first half of the year.

#### #3

#### Risk-oriented growth

Continued high balance sheet quality

Client proximity with holistic advice and two excellent ratings from S&P Global Ratings and Fitch, as well as the stable balance sheet with high own funds, create confidence. Group BKB recorded an increase in client funds of CHF +547.0 million in the first half of 2023. Compared to 31 December 2022, client deposits nevertheless declined by -6.7 % to CHF 29.1 billion, because short-term opportunities in operational liquidity management were used at the end of 2022. Client loans increased by +2.0 % and mortgage receivables grew by +2.0 % to CHF 32.2 billion in line with market trends. Total assets remained constant at CHF 55.3 billion (+0.1 %). In doing so, the Group aligned its balance sheet to stability and managed growth in a risk-oriented manner. Therefore, the total capital ratio continued to rise to 18.4 % (comparative half-year in 2022: 18.1 %). At 20.5 % and 17.9 %, respectively, both the parent company BKB and Bank Cler were significantly above the equity target (13.0 %, including a countercyclical capital buffer for Group BKB).

#### #4

## Consistent and cooperative

Dealing with sustainability and promoting biodiversity

Sustainability plays an increasingly important role for clients as well as for institutional investors and counterparties. Independent ESG ratings are gaining importance in this context. In March 2023, BKB (the parent company) received the ESG risk rating "Low Risk" from Morningstar Sustainalytics. This puts BKB in the top spot among cantonal banks. The rating confirms that BKB is consistently pursuing its sustainability goals and, at the same time, is closely supporting its clients in achieving their sustainability goals. As part of the new commitment in cooperation with BirdLife Switzerland, "Basel blüht auf" (Basel is flourishing), BKB has been supporting projects that contribute to biodiversity in the region since the beginning of 2023.

#### #5

#### Committed to Basel

Teaching financial competence and proximity to the population

BKB is actively committed to the region and its people. In May, it launched the weekly business magazine "Geld & Co." together with Telebasel. Experts from BKB provide information on everyday aspects of money. In order to understand which topics affect the population and clients, client proximity remains of central importance. In the first half of the year, BKB welcomed over 1,300 clients to specialist and hospitality events. The Neighbourhood Saturdays, which have been held twice a year since last year and now attract several thousand visitors per occasion, have also proven their worth. After celebrating in Kleinbasel in June, the next Neighbourhood Saturday will take place on 19 August 2023 in the "Gundeli" on Meret Oppenheim-Platz.

#### Outlook

In the second half of the year, the Group will continue to consistently pursue along the path of Strategy 2022+. The new digital banking system is creating a basis for clients to be able to handle more and more financial matters, regardless of location and time, with greater security. The further expansion and optimisation of the functionalities on offer are currently being pushed forward at full speed. The intra-group transfer of corporate and institutional clients from Bank Cler to BKB, which was completed in the first half of the year, enables Bank Cler to focus on growth in private and real estate clients on the one hand and to support the demanding client groups in the Group's competence centres on the other. In addition, the Group's infrastructure will be optimised further. The focus is on the scalability of processes and a more powerful and secure IT architecture. At the same time, the partnership for cloud applications entered into with Microsoft and tested with an initial migration will also play an important role.

CEO Basil Heeb is convinced: "With our proximity to clients, our stability-oriented business model and a broad-based, sustainable earnings base, Group BKB is very well positioned. This is creating the prerequisites for the current positive momentum to continue in the second half of the year and for us to be able to achieve a good to very good annual result."

CEO Basil Heeb: "The proximity to our clients, our stability-oriented business model and a broad-based, sustainable earnings base are creating the prerequisites for us to be able to achieve a good to very good annual result."

#### Information for investors

#### Half-yearly result 2023

The strategic focus on our strengths, excellent creditworthiness and our proximity to clients are once again making an impact: Group Basler Kantonalbank (BKB) achieved profitable growth in the first half of 2023 and significantly improved its operating result again.
