

#### About us

The BKB Group\* consists of two banks: the parent company Basler Kantonalbank and Bank Cler. Following the acquisition of Bank Cler (formerly Bank Coop) in 2000, BKB employs around 1440 people and has branches in all major cities throughout Switzerland. It has a high level of investment expertise in its Asset Management service, which is of particular benefit to Private Banking clients and institutional clients. Client assets under management amount to around CHF 51 billion and BKB, when measured by its total assets of CHF 55.6 billion, is one of the ten largest banking groups in Switzerland. The parent company BKB has been deeply rooted in the Basel region since it was founded in 1899. It positions itself for its private clients as the bank of Basel for Basel and has a total of 13 branches in the territory of the canton (including Private Banking and the SME centre). As a universal bank for its corporate and institutional clients, it is also active throughout Northwestern Switzerland. The parent company is majority owned by the Canton of Basel-Stadt and has a state guarantee, for which compensation is paid to the Canton. 14 % of the company's capital is listed as participation certificates on the SIX Swiss Exchange. The owner strategy sets the strategic guidelines for the bank and requires, among other things, an above-average level of capitalisation and liquidity. Thanks to its high capitalisation and business model geared towards long-term success, the parent company BKB is one of the safest banks in the country with an AAA rating from Fitch and an AA+ rating from S&P Global Ratings.

Bank Cler is a retail and real estate bank operating throughout Switzerland with a high level of advisory expertise and the "Zak" neobanking offer. Zak users have access to all the bank's offerings and services, including personal consultations at Bank Cler. In total, Bank Cler manages 23 branches, divided into three market areas "Central" (seven branches), "South-East" (nine branches) and "French-speaking Switzerland" (seven branches). It is oriented towards the needs of private clients, Private Banking clients and real estate clients. Bank Cler advises its clients according to their needs and stages of life. It offers them everything they need in money matters: from accounts, cards, E-Banking and Mobile Banking to investment advice, mortgages, pension and inheritance advice and long-term financial planning.

\*Also referred to as "BKB" below. If the parent company BKB is meant, this is specifically stated.

### Business update for the first half of 2025

# Group BKB: 2025 half-yearly financial statements once again showing healthy earnings growth

In the first half of 2025, BKB once again achieved a very pleasing operating profit and increased the Group net profit by +6.7% to CHF 85.6 million. The good result is supported by a broad and continuously growing earnings base, boosts in efficiency, a strong client orientation and an unchanged high degree of stability.

Regula Berger, CEO of the parent company BKB and Chair of the Group Committee, is pleased: "The half-yearly result represents a strong team achievement – supported by a clear strategy, a great deal of commitment and proximity to our clients."

# Strong in a challenging market environment: increase in operating profit

In the first half of 2025, the BKB Group once again achieved healthy, broad-based earnings growth. Net income from interest-related activities increased by +4.9% to CHF 232.0 million. Both the increase in client numbers associated with the introduction of the free basic offering and the forward-looking management of the balance sheet structure contributed to the good result. At the same time, it was also possible to increase commission and service income by +2.0% to CHF 69.7 million thanks to a pleasing increase in clients for delegation solutions. The current geopolitical developments and a risk-conscious trading strategy led to slightly lower trading income (-2.6% to CHF 28.1 million).

#### Efficiency gains within business operations

Productivity was significantly increased thanks to process optimisations, such as the new financing process which enables loan applications to be processed easily, digitally and in a client-friendly manner. At the same time, material expenditure was reduced through systematic cost management; personnel expenditure, however, increased moderately. Despite significantly higher compensation paid to the canton of Basel-Stadt for the state guarantee (+49.0% to CHF 7.6 million), operating expenditure increased only slightly (+2.3% to CHF 183.6 million). The overall increase in efficiency and profitability is confirmed by the improvement in the cost income ratio from 55.2% (first half of 2024) to 55.0%.

#### Security and stability as a basic principle

With an increase of +5.0% to CHF 139.1 million, the improvement in business performance in the 1st half of 2025 was very gratifying. Thanks to this very good operating profit, it was possible to increase Group net profit by +6.7% to CHF 85.6 million and strengthen reserves for general banking risks by a further CHF 45.5 million.

The orientation towards qualitative growth and the targeted management and optimisation of the balance sheet structure led, as planned, to a slight fall in mortgage loans (-0.6% to CHF 33.6 billion) and total assets (-0.4% to CHF 55.6 billion).

#### Guided to success by a clear client focus

In the first half of the year, BKB implemented various improvements relating to simplicity, client satisfaction and investment expertise, all of which led to pleasing client growth thanks to noticeable added value.

#### Simplicity:

With the introduction of digital onboarding, the continuous expansion of self-services in Digital Banking, a free basic offering, an improved TWINT solution and the free account for associations, the range of services available was further developed in a targeted manner and the use of these services made easier for clients in the first semester of 2025.

#### Investment expertise:

In recent years, BKB has continuously expanded its advisory expertise and its range of delegation solutions. The growth in delegation solutions demonstrates that confidence in BKB's Investment Solutions and asset management has increased further. In the first half of the year alone, they grew significantly by CHF +363.2 million to as much as CHF 8.8 billion.

#### Client satisfaction:

The client orientation implemented in recent years is making an impact: in the first half of 2025, client satisfaction for both Group banks achieved pleasing values and confirms the positive perception of the quality of service within the Group. A client panel was launched in spring 2025 to improve the understanding of client concerns and address client needs more efficiently.

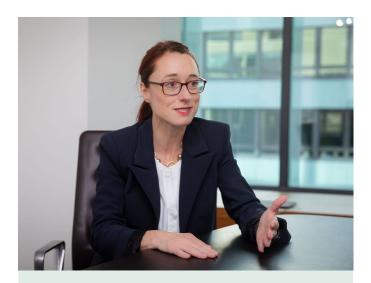

#### Client growth:

Both Group banks were able to strengthen their client base and gain just short of 7,000 new clients since the end of 2024. A large proportion of these are attributable to the Zak app from Bank Cler, which is enjoying growing popularity. The next step will be to exploit the potential of existing secondary bank clients by expanding their relationship so that BKB becomes their main bank.

# Outlook: focus on Strategy 2026+ and the market environment

BKB is expecting the economic and geopolitical environment to continue to be challenging in the second half of the year. The persistently low interest level remains a key influencing factor for future earnings trends. In order to react to possible changes at an early stage, BKB is closely observing the interest rate movements and continuously adapting its balance sheet structure, for example, through conscious management of financing and investment positions or the targeted expansion of other revenue streams.

BKB is currently developing the new "2026+" strategy, which will be presented at the end of August 2025. It sets the course for the next four years and paves the way for successful development in an increasingly dynamic market environment.

Regula Berger is cautiously optimistic about the second half of the year: "The current environment harbours several risk factors with persistently low interest rates, geopolitical tensions and the uncertain development surrounding the US tariffs. However, BKB is in a very good position and has a stable earnings base which we want to use to build on the good result of the previous year."

#### Information for investors

The price of the BKB participation certificate developed positively in the first half of 2025, achieving a total performance of around 14%. This shows that investors trust that BKB is well equipped for the future, even in a challenging banking environment.

#### Company profile

Rooted in Basel for 125 years, Basler Kantonalbank (BKB) is active throughout Switzerland as a niche player in selected business areas in addition to its home market. With its dense branch network in the city of Basel and its digital services, BKB is always close and available. The subsidiary Bank Cler AG makes banking simple and convenient throughout Switzerland. The entire Group employs around 1,400 people and is one of the ten largest banks in Switzerland in terms of total assets.
